BDM MACHINERY

ABOUT US

Our company is an organization that has strengthened its place in the sector in the field of machine spare parts and hydraulic systems. With the 25 years of experience we have gained over the years, we have continued our mission of providing high-quality products and reliable services to our customers.

In recent years, we have transitioned to a modern structure with the participation of the younger generation.

We started to serve you as BDM MACHINE in 2024. By creating a team equipped with innovative ideas and up-to-date technologies, we closely follow the developments in the sector. This change has transformed not only our business processes but also our customer relations. Thanks to our customer-oriented approach, we always focus on providing solutions tailored to your needs. With our expertise in machine spare parts supply and hydraulic systems repair and maintenance, we enable you to optimize your industrial processes. We constantly work to maximize customer satisfaction by prioritizing quality and reliability.

Our goals for the future include providing sustainable solutions by following technological innovations and strengthening our place in the sector. In this direction, our company both preserves our traditional values and continues to grow with our modern understanding.

BDM MACHINERY

OUR SERVICES

HYDRAULIC SYSTEMS

We provide repair and maintenance services for hydraulic pumps, valves and hydromotors in many areas where hydraulic systems are used, especially in construction equipment and agricultural machinery.

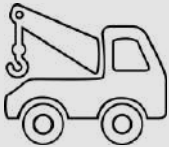

FASTENERS

We produce fasteners in desired sizes and quality.

MACHINING

Products with special dimensions and in accordance with the technical drawing are processed on our CNC LATHE and MILLING machines.

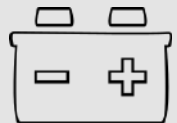

WELDED MANUFACTURING

We manufacture products in desired dimensions, specifically for machine spare parts.

SPARE PARTS

We provide services in the supply of fasteners, machining products and imported parts, especially in the Agricultural Machinery and Construction Machinery sectors.

PLASTIC VACUUM FORMING

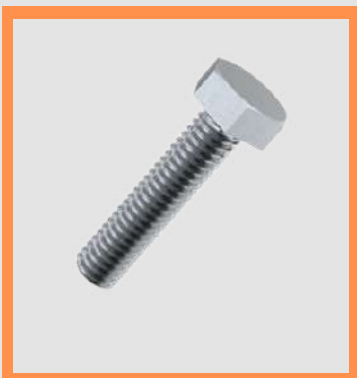

We perform plastic forming processes in our vacuum machine in some special areas such as chain protection covers in agricultural machines and housings in industrial machines.
